

The ST600 is used for Stabilizing and Milling

Why the Schibeci ST600 is the best Stabilizing Attachment:

- ▶ Solid and Robust 1" thick mainframe.
- ▶ Schibeci has superior **level/depth control** because of the direct skid design. That means that if the skid steer is riding up over material, the levels of the 600 will not change. It's levels are independent from the angle of the skid steer.
- ▶ The ST600 has ports onboard that are used to spray stabilizing fluid/binder directly into the cutter box.
- ▶ The ST600 is **over engineered** and are **extremely robust**.
- ▶ There are very few spare parts required for any Schibeci machines
- ▶ Schibeci ST600's don't use gear boxes, chains or any other form of transferring power that can add to maintenance or reliability problems.
- ▶ Schibeci machines are **simple to operate** and user friendly.

Schibeci cutter drum technology and designs are internationally recognised and awarded.
(Better Roads Magazine - Top Rollout Award)

Suits High Flow Skid Steers
Accurate, Efficient and Effective
Schibeci ST600's are made for tough conditions

Performance Guidelines

- Mill & Stabilize Road Pavements
- Built to suit High Flow Skid Steers
- Independent level control on both sides of the attachment
- Powerful, low maintenance, twin direct drives
- Dust Suppression & Stabilization Fluid Binder ports standard

ST1000 working on large scale projects

Below: Full Depth Stabilization

Specifications

	ST600 Milling & Stabilizing
Cutting Width	600mm
Cutting Depth	220mm
Pressure Range	150 to 206 Bar (2200 to 3000 PSI) Can be suited to 350 Bar (5000 PSI)
Horsepower Required	70 to 150KW 90 to 200HP
Hydraulic Flow (minimum)	140+ litres
Operation Weight	1400kg
Independent Level Control	Yes
Side Shift	Hydraulic

Features

- Dual Direct Hydraulic Drive (No Gearboxes or Pulleys)
- Floating Turn Table
- Dust Suppression System
- Stabilization emulsion injection ports directly into cutter housing
- Adjustable Level Control Gauges
- Interchangeable Wear Strips on Skid Plates
- Quick Change Tooling System
- Safety and operations manual provided
- All Removal Tools Required Supplied with the Machine
- 12 Month Warranty (excluding wear and improper use)

Built Tough for a Tough Industry
Schibeci, Proudly Australian Made & Australian Owned
